NATIONAL BOARD OF HEALTH.

Special to the Star. WASHINGTON, March 8 .- Below is the call ssued by the National Board of Health for a National Convention:

The National Board of Health requests that all who are interested in vital statistics, and especially those who are charged with the duties of State or municipal registration, will meet with it in Washington, on the 6th of May next, for the purpose of considering the best method for the collection and publication of such statistics. This Convention will consider more especfally mortality statistics, for which it is extremely desirable to secure more uniformity than exists at present in nomenclaoure, in nosological arrangement, and in the forms of tables or graphic representations intended to show the relations of causes of death to locality, meterology, sex, age, nativity, occupation, and birth-

All registars of vital statistics are respectfully invited to forward to the Board, as soon as possible, their suggestions as to nomenclature, blanks, forms, &c., including the following points:

1. Is it best to accept for the present the nomenclature of diseases drawn up by the Royal College of Physicians of London; and if not, what substitute is suggested?

2. Furnish a copy of the State or municipal law or ordinance relating to registration of births and deaths; state the objections to it and the changes which should

3. Furnish copies of the blank forms for reporting cases of death or of birth actually in use, with criticisms.

4. Furnish specimen pages of the record or registration books for births and deaths. with criticisms and suggestions.

5. Furnish copies of such forms as are recommended for a weekly report of deaths from a city; for a monthly report of deaths and births from a city; the same from a State, and for annual reports from a city and from a State.

6. Furnish also copies of such forms of statistical reports as are recommended for use by asylums, dispensaries, hospitals, prisons, and other public institutions.

7. Furnish such forms for registration of births and of marriages as are recommended.

8. Please state whether registration of cases of certain contagious or infectious diseases should be attempted; and if so, indicate the diseases and give forms.

All persons interested in the subject of vital statistics are invited to forward suggestions in regard to the above or any other questions pertaining to the subject, and to indicate as precisely as possible the methods by which their suggestions are to be carried out.

It is desired that communications on this subject shall be presented without delay, in order that they may be embodied schedules which will be prepared for the use of the Convention.

THE PENSION QUESTION. "The Select Committee of the House, recently appointed to investigate the payment of pensions, bounty, and back pay, having gotten fairly under way, the country may soon expect some interesting developments concerning the management of the Pension office. .

The sessions of the Committee have so far been devoted to the examination of the Commissioner of Pensions, Mr. Bentley, who has made a very lengthy showing of the manner in which his office is conducted. His examination will be completed in a few days and the statement furnished to the country.

The members of the Committee seem determined to thoroughly sift the whole subject committed to their sharge, and it is confidently believed that the results of their investigation will prove of very material benefit to the soldiers and others claiming pensions.

The committee is composed of Messrs. Coffroth of Pennsylvania, Myers of Indiana, Geddes of Ohio, McMillan of Tennessee, Harmer of Pennsylvania, Caswell of Wisconsin, and Thomas of Illinois.

THE COMMITTEE will also be empowered to investigate the management of the various Soldiers' Homes so far as relates to the allotment and payment of pensions to the inmates.

Suicide of a Boy Who Despised to Be Whipped.

Specials to the Star.
BLOOMINGTON, ILL., March 8.—Mrs. Louis Bibel yesterday afternoon approached her divorced husband, Louis Bibel, in the street here and threw half a pound of cayenne pepper in his face. While he was half blinded by the pepper she drew a cowhide and commenced to whip him. Bibel, after receiving several blows, grasped her and seized the cowhide. Just at this juncture, Louis Bibel, Jr., their son, aged 20, drew a revolver, Colt's 38, and rushing into the crowd, put the pistol to his father's head. Bibel instinctively dodged, and the ball knocked off his hat, the powder burning his forehead and the top of his head into a black blister. Bibel, Sr., then clinched with his son and forced him half down.

The boy cocked the pistol and fired a second shot, which passed between his father's side and arm. In the meantime, another son, Charlie, aged fourteen, had jumped in and kicked his father twice. By this time the crowd had seized the combatants and separated them. The police also arrested Adolph Freiberger, a German, who, it is said, has been intimate with Mrs. Bibel since she obtained her divorce and even before. Freiberger had on his person a revolver, loaded, and similar to that of young Louis. Mrs. Bibel, young Louis and Freiberger were locked up. Bibel, Sr., declares that his wife tried to poison him some months ago, and about six months ago he tried to hang himself.
